Greensboro, NC is an amazing place—it used to be fun but hasn't been for years—the establishment ruined it with help from government; any time I read about it I think of what everyone has known for years: That the Greensboro Police Department, Kotis Properties, Alston Realty Group, city officials--and even "Google's Own" Andrew Swofford--the system, as I was told by friends and family--all get together to run campaigns on people. Tony Hill was the first to be run out of 'Westerwood,' Gil Maness came next, then it was "my turn" after I went to the city to begin with (I barely know Maness and never knew Hill, nor would I have ever known him—he got railroaded right away). After going to the City of Greensboro about Charlotte Reese--who barreled out of her house on others for years--all sorts of people began coming to the property after I told the city about Reese: Community Battle-Axe Gail Barger--who was rarely in Greensboro to begin with, despite what the city might say and has said--some handy-man named Kim Maynard came next--both were dispatched by the Guilford County Sheriff's Office--who soon tired of the Westerwood Neighborhood Association coming to me—that included Charlotte Reese, who was clearly crazy so was handled with care by GCSO. They made sure she got the message but thanks to the City of Greensboro she also got cops. Reese, who changed her name to "Sutton" (which it apparently was the entire time) was also charged by the GPD for "DC." How Reese was with police was how she was for years and how white, entitled people can get--especially if they have money or so the city itself told me this was all about. "People with money run everything, it's always been that way" said a cop. But Charlotte Reese was served so many times by GCSO they were entirely aware of her right away--the GPD has even been to Catawba County on account of my big mouth about how the City of

Greensboro actually does business--with wealthy whites--Tony Hill and others not in Nancy Vaughan's secret, little circle of money fare much differently, if they even matter.

What cities do now is what corporations do--they have a line to sell—everything's great with opportunity for all—they expect everyone else to help them sell that and many do, no one wants to rock the boat because if they do, they'll be excommunicated from the fold—but employers are precisely like the City of Greensboro--if you're an outsider at work, you'll fight insiders--if you're an insider on your way to being an outsider at work, they'll run a campaign on you before you go, quit or leave town thanks aw
